

Committed to Cameron Parish

For more than 20 years, Semptra Infrastructure has been part of Cameron Parish, investing not only in energy infrastructure but also in the people and organizations that strengthen the community.

Across Cameron Parish, we partner with local schools, emergency responders and community organizations and support initiatives focused on increasing opportunity, advancing local economies and protecting the region's natural environment.

Supporting the community. Investing in the future.

Semptra Infrastructure's presence in Cameron Parish includes Cameron LNG, Cameron Interstate Pipeline, the Port Arthur Pipeline Louisiana Connector and LA Storage. These assets are designed to enhance energy networks, support U.S. LNG exports and help meet rising demand for reliable energy, while contributing to continued economic activity and investment in the parish and surrounding communities.
